

The AMS Automatic Label Affixer

If your company is affixing computer generated address labels by hand, then you can save valuable staff time and money by using the 6001 automatic label affixer from AMS.

The reliable 6001 operates at speeds of up to 15,000 labels per hour and can accurately affix labels onto items up to C4 and larger in size, and up to 12.5mm thick. It can handle labels produced on any type of continuous backing paper and to simplify sorting and monitoring the 6001 affixes labels face up. A missing label indicator can be set to stop the machine when it detects a missing label, a feature which is particularly useful when labelling for Mailsort.

- ◆ Operates at up to 15,000 mailing pieces per hour
- ◆ Easily moveable label head allows precise lateral positioning
- ◆ Touch sensitive control for vertical positioning (with choice of Metric or Imperial) with 2 programmable pre-sets.
- ◆ Accepts labels with or without sprocket holes
- ◆ Affixes labels face up to simplify sorting and monitoring
- ◆ Easy to use and simple to load
- ◆ Missing label indicator (plus label and envelope indicators)
- ◆ Rugged steel construction and the use of three separate motors ensures long and reliable operation
- ◆ AMS Conveyor stacker is available as an optional extra
- ◆ Technical Specification:

Paper Input: Width: Min 115mm, Max 412mm

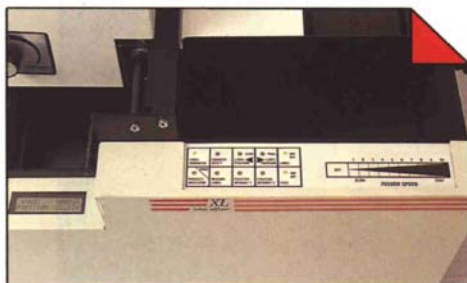

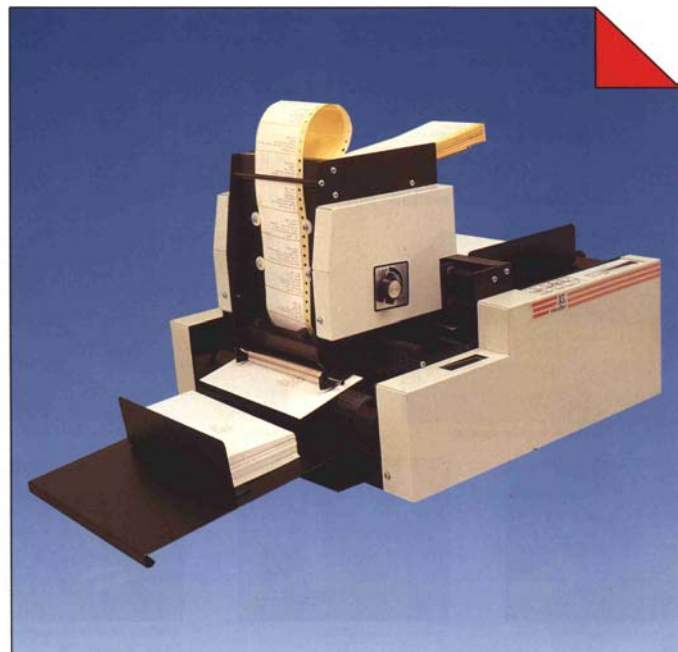

Label Input: Width: Min 50mm, Max 127mm

Height: Min 23mm, Max 100mm

Weight: 30kg

Dimensions: 510mm(w) x 530mm(d) x 420mm(h)

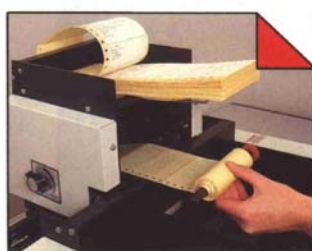

Counter: Re-settable item counter

LCD display and touch sensitive control panel.

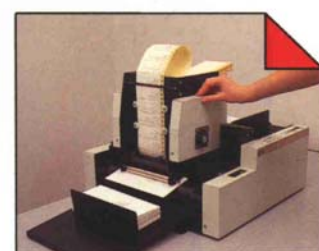

Envelope feed accepts items up to 412mm wide.

Backing paper pick-up reel is easily accessible.

Simple loading of labels.

Labelling head can be easily moved for lateral positioning.
