

**THE AMS 7004, 7005**  
**Your Office Professional**  
**Folder Inserter**

**THE EASY TO USE FOLDER INSERTER FOR  
LARGER OFFICE MAIL RUNS**

Do you have limited space in your office or mailroom? Then the quiet AMS 7004 & 7005 can help you out. They fold and insert your mail and have everything you expect from office equipment: small footprint, low noise and office looks.

A user-friendly full colour touchscreen with clear icons make the AMS 7004 & 7005 easy to use for everybody in the office. They are even easier to use than a photocopier.

EASY TO USE - AS SIMPLE AS A PHOTOCOPIER

LOAD & GO - NO SPECIAL SKILLS REQUIRED

PROFESSIONAL LOOKING MAIL PIECE

LOW NOISE LEVEL - FOR ANY OFFICE ENVIRONMENT

FULLY ACCESSIBLE - ERGONOMIC DESIGN

## Your Office Professional

### Folder Inserter

#### EVERY KIND OF APPLICATION

Thanks to AMS's unique Flexfeed technology, you can load any document size in each of the 3 feeders. The variety in applications is up to you. Furthermore, you don't need to fan documents before loading.

#### PROFESSIONAL MAIL PIECE

Collating the documents before folding them is not only faster than collating them in the envelope, it also ensures perfect presentation and reduces the risk of jams.

#### POWERFOLD6

With Powerfold6 you can fold up to 6 pages in three and up to 8 pages in half. Both crisply and silently.

#### DAILY MAIL

The Daily Mail mode allows you to process sets fed by hand, stapled or unstapled.

#### SPECIAL FEEDERS

This feeder has been specially designed to feed more different paper types, including coated material and even small booklets.

#### LOAD & GO

Everybody can use the AMS 7004 & 7005. No need for skilled operators thanks to Load & Go. Just load documents and envelopes and press the button to Go. The AMS 7004 & 7005 will adjust all settings automatically and even save them in the memory for instant recall. Regular jobs? Just run Load & Go and store the settings in one of the 20 available jobs.

#### SECURE PROCESSING

To ensure that every recipient gets the correct mail piece, the AMS 7004 & 7005 electro-mechanical thickness detection protects against double feeding. It is insensitive to dust, and works with toner or coloured paper. The AMS 7004 & 7005 measures the thickness of every document from each feeder via Secure & Feed.

#### PRINTMACHINE SOFTWARE - ENRICH YOUR DOCUMENTS

AMS's Print Machine Software helps you to add OMR-marks to your documents. A whole new world of mail creation possibilities will be unfolded.

#### OPTICAL MARK RECOGNITION (OMR)

Using a sequence of marks, the AMS 7004 & 7005 is able to securely process sets of documents with a varying number of pages to ensure they reach the correct recipient. With Flex-OMR, the AMS 7004 & 7005 can also "read" non-AMS codes.

#### PRICING IN PROPORTION

All our new machines have been designed with Pricing in Proportion (Royal Mail's new tariff where mail is priced according to both its size and weight) in mind, and are ideally suited to both the professional mailroom and office environment.

#### CUSTOMER AND AFTER SALES SERVICE

AMS ensures the best customer and after sales service in the world.

#### WHY CHOOSE AMS?

AMS is the European leader and a leading worldwide provider of mailing and logistics solutions. Our innovative products and services bring simplicity and efficiency to your complete mailing process to make your business run more effectively.
