

## 6001-XL LABEL & STAMP AFFIXER

### Improves the efficiency and presentation of your mailing process

#### What Does It Do?

The 6001-XL fixes adhesive labels on to mail pieces. It also has the ability to stick royal mail stamps on to mail, making it an ideal way to deliver eye-catching post that looks like it has been sent from an individual instead of a business. The unique system operates at speeds of up to 15,000 per hour and can accurately affix labels or stamps on to items of many sizes and up to 12.5mm in thickness.

What makes the label affixer so unique to others is that the roll adapter makes the system able to handle stamps. The stamp kit is a bolt on kit that can be swiftly and easily added to transform the 6001-XL into a stamp affixer.

#### How It Works

The labeling head slides from side to side allowing the label to be placed just about anywhere on the mailing piece. It comes with a built in feeder and depending on document specifications, can feed mailpieces through in different directions, to apply labels/stamps in various locations.

The 6001-XL can be used in-line with a conveyor so labelled pieces can be stacked in a neat, sequential order for easy removal, or with other mailing equipment such as address printers. It can also be switched to stop or jump when it detects a missing stamp or label, a feature that is particularly useful when labeling for Royal Mail Mailsort.

#### Why Do I Need It?

If you are looking for an economical alternative to applying stamps or labels by hand, the 6001-XL is the answer. Labels/stamps can be placed on a wide variety of media including envelopes, folded stock, double postcards, newsletters and booklets. The labeller is capable of short runs as well as large mailings making it perfect for office users, mailing houses, commercial and industrial users.

#### Key Features:

- Applies 1 label or stamp to the front of a mailing piece
- Tabs Up To 15,000 Mailing Pieces Per Hour
- Moveable Label Head For Accurate Label Positioning
- Touch Sensitive Control Panel
- Operates In Line
- Rugged Steel Construction
- Optional Feeders & Conveyors

Control	LCD Crystal Display With Touch Pad
TECHNICAL INFORMATION	
Machine Dimensions	(W)560mm x (L)711mm x (H)585mm loaded
Machine Weight	34kg
Power	230 VAC 50/60 Hz

## OPTIONAL EXTRAS

### Optional Equipment

AMS manufacture a range of machine cabinets that will easily support your mailing equipment as well as provide ample storage space. AMS also manufacturer a range of conveyor stackers and dryers to complement your equipment thereby making it easier and more efficient to produce your mailings.

The 6001-XL requires a feeder, which allows you to stack mailing pieces to be labelled. A Catcher Tray is also a great optional feature that provides a low-volume alternative to a conveyor for small jobs.

The 6001-XL Automatic Label Affixer can also work with the 5002-KT2 tabbing machine. This enables you to save even more time and money as mail can be automatically labeled, then tabbed.

### Mailing Supplies

AMS supply a wide range of low-cost consumables to suit our mailing equipment including Tabs.

Tabs come in many colours and there are even frosted and opaque options to suit the design of your mailing.

**The AMS 6001-XL Automatic Label Affixer can also work with the 5002-KT2 tabbing machine.**

## Why Choose An AMS Label Affixer?

AMS is one of the UK's leading suppliers of mailroom equipment. As well as having a dedicated team of knowledgeable experts to offer advice and bespoke solutions to suit your mailing needs, we have a well-trained customer support team and highly skilled team of field engineers to support you after your purchase.

This reliable and efficient after-care support service is provided to ensure you get the most out of your purchase. We also offer a comprehensive range of technical support and service packages that cover both equipment and software. Our maintenance packages are an economical way to maximise performance and the longevity of your machine, overall resulting in peace of mind.
