

AMS FLEXSTREAM SOFTWARE

In combination with any AMS mail inserting system, FlexStream will speed up your mail processing and increase security, it can even reduce your printing and postage costs significantly. Often recovering far more than the daily cost of system ownership without any amendments to your existing systems.

FlexStream reads the data in your unprinted documents and adds the appropriate markings before printing, so that the inserter used can read these marks and perform all of the functions needed to securely process your mail automatically. In order to further optimise your use of the inserting system, FlexStream is capable of sorting through your unprinted documents and collating together any that are intended for the same recipient. Flexstream works on any Windows® operating system, allowing you to benefit from the simplicity of click and drag set-up.

Improve your mailing processes

- Increase the integrity of your mailings by adding scancodes that can be used by inserters
- Reduce postage costs by combining documents intended for the same recipient into a single mail piece
- Turn your document into a marketing tool by adding conditional text, graphics and barcodes and by utilizing selective feeding
- Eliminate the costs of preprinted forms by adding overlays to your documents
- Convert traditional simplex printed documents to duplex to reduce paper costs and provide additional postage savings.

FlexStream Basic

FlexStream Basic is the solution for users who need to add scancodes (OMR, 1D or 2D BCR) to their documents to increase integrity and enable automatic processing on inserters and who want to reduce costs by combining documents for the same addressee into single mail pieces.

FlexStream Advanced

FlexStream Advanced is designed to manipulate and enhance existing PDF documents. All features of the basic edition to add scancodes to documents are available. On top of that the Advanced edition enables users to add (conditional) text, graphics and barcodes to the document to turn documents into promotional tools.

FlexStream Feature Comparison

Basic Adv Prof

Input files

Open (multiple) PDF files of any number of pages	●	●	●
Support of different layouts for each input file		●	●
Digital inserts (conditional)			●

Read and manipulate Data

Read text from input document	●	●	●
Check for images on input document	●	●	●
Read/decode barcodes from input document		●	●
Generate counters/(sequential) numbering		●	●
Generate dates and times in any format		●	●
Define functions in Visual Basic		●	●
Use/add look-up tables for translations and file look-up		●	●

Grouping and sorting

Define document breaks	●	●	●
Group documents in sets	●	●	●
Overcount splitting	●	●	●
Overcount separation	●	●	●
Order documents within sets		●	●
Sort sets		●	●
Summary report	●	●	●
Operator instructions	●	●	●

Scancode generation

Select and configure inserter properties	●	●	●
Define divert and feed options	●	●	●
Create Scancodes (OMR, 1D Barcodes, 2D Barcodes)	●	●	●
Scancode design forms for correct Scan code placement	●	●	●

Document Layout

Remove cover (leading and trailing) pages from input documents		●	●
Document scaling (fit to paper)		●	●
Duplexing of document		●	●
Add overlays to the document (front- or backside)		●	●
Blank out areas	●	●	●
Add (conditional) shapes		●	●
Add (conditional) text		●	●
Add (conditional) pictures		●	●
Add (conditional) barcodes		●	●

Preview

Preview processed documents per page, document or set.	●	●	●
Dataheet view displaying all document data in table format		●	●

Printing

Print on any windows supported printer	●	●	●
Print/save project to PDF	●	●	●
Multiple printer support		●	●
Closed loop processing			●

Other Output

Email all or selection of the documents			●
Save documents for archiving			●

	Minimum	Recommended
Operating System	Vista, Windows 7, Windows 8/8.1, Windows 10, Windows Server 2012. All in both 32bit and 64bit.	Windows 10
Processor	Intel i5 - 2.66Ghz	Intel core i7-3.2Ghz
Memory	4GB	8GB
Free HD Space	1000MB	2000MB
Monitor Resolution	1280 x 1024	1920 x 1080
Internet	Only required for Postal and Secure and tracked email modules	Internet access for updates, online scripting help, easy licensing, latest drivers, etc.
