ams addressing & mailing solutions ltd

AMS 7000-7003 FOLDER INSERTER RANGE

Improves the efficiency, security and presentation of your mailing processes

What Does It Do?
Stuffing envelopes can be a long and tedious task, often taking up time that could be spent on more productive matters. The AMS 7000 Folder Inserter range of machines removes this time consuming chore by collating, folding, inserting and sealing your mail in one single process.

The flexible feeders can handle both A5 & A4 sizes and varying paper qualities. Loose or stapled paper can be automatically fed through the machine and when using the the manual-feed option, up to 5 sheets can be processed.

Featuring low noise levels, easy operation, flexibility and compact size the AMS range will fit in to any modern office environment. The range comes in 4 different models with various numbers of document feeders, this means we can match the right model to your applications and requirements. This way you only pay for features you need.

Easy To Use
The compact machines are so simple to use, with the Load'n Go program all you do is load your documents and envelopes then press the button to go. Up to 100 envelopes can be filled in just 3 minutes, that's over 2000 in an hour. Brochures and stapled paper can be enclosed and you can even choose between four fold types according to your requirements. The machines can be set up for uninterrupted operation when processing high-volume mailings. The machines will also adjust all settings automatically and can store up to 9 jobs in the memory for future recall.

Why Do I Need It?
Whether you send out direct mail campaigns, invoices, statements, letters, brochures or other documents, the AMS 7000 range handles them with ease. There is also an Opticial Mark (OMR) capability option to eliminate the manual sorting of documents and ensures the right pages go to the right recipients. This works by printing a coded set of marks on your pages. The machine simply reads the marks and inserts the required number of documents into each envelope automatically.

Key Features:

- **Includes 4 different models to suit your requirements**

- **Up to 100 envelopes can be filled in just 3 minutes**

- **Small enough to fit on your desktop and low noise level**

- **As easy to use as a photocopier**
